**NATIONAL REGISTER OF HISTORIC PLACES
REGISTRATION FORM**

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in How to Complete the National Register of Historic Places Registration Form (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

historic name: Ramsay

other names/site number: DHR File Number 002-0844

2. Location

street & number 7760 Rockfish Gap Turnpike

not for publication: N/A

8. Statement of Significance

Applicable National Register Criteria (Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

- ☒ **A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- ☐ **B** Property is associated with the lives of persons significant in our past.
- ☒ **C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- ☐ **D** Property has yielded, or is likely to yield information important in prehistory or history.

Criteria Considerations (Mark "X" in all the boxes that apply.)

- ☐ **A** owned by a religious institution or used for religious purposes.
- ☐ **B** removed from its original location.
- ☐ **C** a birthplace or a grave.
- ☐ **D** a cemetery.
- ☐ **E** a reconstructed building, object or structure.
- ☐ **F** a commemorative property.
- ☐ **G** less than 50 years of age or achieved significance within the past 50 years.

Ramsay
Albemarle County, Virginia

7. Description

Summary Description:

Ramsay is located within the picturesque Greenwood area in western Albemarle County, Virginia. The main house is a two-story, frame, Classical Revival-style building, constructed circa 1900. The north elevation of the house faces the Blue Ridge Mountains and is bordered by Route 250 to the south, which provides access to the property. This estate is comprised of 78.4 acres and includes a number of significant buildings, a boxwood garden and other resources. Charlottesville architect Milton L. Grigg added to and sympathetically remodeled the main house in 1937, 1947 and again in the early 1950s. Ramsay was the home of members of the locally prominent Langhorne and Gibson families and was the retirement home of the "Gibson Girl," Irene Langhorne Gibson.

Ramsay
Albemarle County, Virginia

Detailed Descriptions:

Main House (#1)

The main house at Ramsay is set within 78.4 acres and is surrounded by numerous outbuildings and other resources. The north elevation faces the Blue Ridge Mountains while the south elevation overlooks Route 250. The east elevation overlooks the beautiful boxwood garden laid out during the 1930s alterations and additions to the property by Charlottesville architect Milton Grigg. The main house is a Classical Revival-style frame building begun ca. 1900 with sympathetic additions from 1937, 1947 and the early 1950s.

William H. Langhorne was responsible for the construction of the house today known as Ramsay.¹ It was a frame, two-story, four-bay main block with one-story wings on either end and was said to be one of the largest frame houses in the county. The main elevation originally featured a gable roof with four end chimneys and a Greek Revival portico with a gable pediment supported by paired Doric columns. The rear elevation had twin doors shaded by a flat-roof portico trimmed in Chippendale railing and there was a small screened porch on the west side of the house. Originally, the house had a modified central-passage, double-pile plan. On the first floor was an entrance hall, parlor, living room, dining room, kitchen and a bedroom. An ell-shaped stairwell led to the second floor that contained two bedrooms and a bathroom.

Chiswell Dabney (Chillie) Langhorne purchased Mirador, adjacent to Ramsay, in 1892, and began to acquire surrounding properties. He purchased Ramsay in 1914 from his cousin William Langhorne. Planning to live there, he began to make alterations to the house and added a bathroom and closet to the first floor. Chillie Langhorne, however, became ill and never moved to Ramsay. Instead, by 1916, he deeded the property to Genevieve Peyton Langhorne, his caretaker, and widow of his second son, Harry.

By 1936, the house was owned by Langhorne Gibson and his wife, Parthenia, a son of Chillie Langhorne's daughter, Irene Langhorne Gibson. In 1937, Charlottesville architect Milton L. Grigg was hired to alter and expand the house for the Langhorne Gibsons. The house today displays Grigg's work.

Ramsay is currently composed of a seven-bay main block with later additions at the west end. The foundation is brick with a partial basement under the earliest section of the house. Grigg removed the original porticos and built a full-height, three-bay porch with a modillion cornice, topped by a balustrade, on both the front and rear elevations. Each porch is supported by square posts and pilasters, all with molded caps. The columns are clustered by threes at each porch corner and the segmented arches between the bays have molded keystones.

Grigg also raised the east and west wings to two stories. The front (north) elevation has six-over-six, double-hung sash windows with molded sills and louvered shutters. In addition, molded cornice lintels cap the windows flanking the main (north) entrance, which consists of an original six-paneled door with rectangular sidelights and an arched fanlight. The hipped imitation slate roof is complimented by a modillion cornice that runs around the entire main block of the house. There are currently four corbel capped brick chimneys; two interior chimneys marking the original ends of the earliest section of the building, and two exterior end chimneys along the east and west elevations of the two-story wings.

Section 7 Page 4

In 1937, on the interior, Milton Grigg added a master bedroom suite to the second floor of the east wing and converted a portion of the east parlor into a library complete with floor-to-ceiling bookshelves and paneled doors hiding the bathroom and closet previously installed for Chillie Langhorne.

Milton Grigg returned to the house in 1947 to add a new west dependency containing a servants' dining area and a gable-roof utility room. This is a one-and-a-half-story building connected to the main house by a one-story hyphen with a balustrade above. The enclosed hyphen connects to the main house through a first floor open porch that is supported with molded capped square columns. The roof deck above the hyphen connects to an enclosed second-floor sleeping porch with square pilasters, 9-light casement windows, and a solid balustrade design. The addition roofs are all seamed metal and either gable or hipped in design.

In 1950, Grigg completed more work at Ramsay including the conversion of the earlier bathroom and closet behind the library into a bamboo room with cork floors and bamboo lattice covered walls. Grigg installed a new bay window along the first floor east elevation, to the north of the chimney breast. To the south of the chimney is a multi-paned French door, with louvered shutters, that opens from the living room out onto the cobblestone patio with boxwood garden beyond.

The front entrance presently allows access to a front hall and largely intact interior from the 1930s alterations. The first floor now includes a library, living room, sitting room and dining room. The Milton Grigg west addition currently houses a utility room, kitchen and breakfast room. A stair, located to the right of the front entrance, allows access to the three bedrooms, three bathrooms and a sitting area on the second floor. This intricate maple stair features a Chinese Chippendale-style balustrade.

The changes to the interior ornamentation by Milton Grigg include the use of molded cornices and architrave trim. Grigg also enhanced the dining room with the construction of a handsome built-in cupboard on the south section of the west wall, featuring three scalloped shelves above a two-door cupboard all set within a round-arched shell-headed opening. The fireplace mantel in this room features an overmantel with broken pediment, a molded cornice and scrollwork. The frieze displays intricate carvings reminiscent of Classical design motifs. The rest of the mantels throughout the house, though less detailed, are all very similar in style, some with overmantels and some without. The second floor sitting room fireplace has crossette (eared) molding and a cornice mantel. This and the master suite fireplace mantel are products of the Milton Grigg work. Other interior details include paneled walls, chair rails, wainscoting, and original hardwood floors.

Although the interior of the house received a great deal of decoration and ornamentation with Grigg's arrival on the property in 1937 and his subsequent returns in 1947 and the early 1950s, the exterior experienced the greatest change, thus making the building as it stands today a remarkable example of Milton Grigg's style and skill. Grigg's work at Ramsay also included designs for a guest cottage, a barn and the boxwood garden.²

Section 7 Page 5

National Park Service**

**National Register of Historic Places
Continuation Sheet**

**Ramsay
Albemarle County, Virginia**

Barn (#2)

The two-story barn was designed by Milton Grigg, ca. 1937, and includes a three-bay main block under a cross-gable roof flanked by shed-roofed, one-story additions on its north and south ends. At the second floor level, under the gable on the west elevation, is a round-arched double-leaf door with strap hinges. The east elevation has four board-and-batten doors on the ground level and three louvered windows on the second level. A simple shed-roofed arcaded portico shelters the four doors and spans the distance between the one-story wings at either end of the building. A narrow four-sided cupola with louvers tops the cross-gable roof.

Guest Cottage (#3)

The guest cottage was built ca. 1950. The cottage, the retirement home of Irene Langhorne Gibson, is wood frame with weatherboard siding. This three-bay, single-pile, one-and-one-half-story building has a gable asphalt-shingled roof with dormers. The floor plan includes two bedrooms on the first floor along with a dining room, living room, kitchen and two bathrooms while the half-story has an additional bedroom and bathroom. The bathroom in the master bedroom is oversized to provide a comfortable space for Irene Langhorne Gibson as she required the use of a wheelchair. Hyphens connect the house to symmetrical dependencies.

Boxwood Garden (#4)

The boxwood garden, designed by Milton Grigg ca. 1937, is located to the east of the main house. The garden includes a cobblestone patio with a fishpond at one end and garden benches and planters spaced along a grassy plot bordered by boxwood.

Tenant House (#5)

The tenant house was constructed ca. 1900, and is still in use today as the farm manager's residence. It is a two-story, four-bay frame house with weatherboard siding and a metal cross-gable roof. A two-bay porch with turned posts and a simple railing covers the central two bays of the façade.

Tenant Garage (#6)

The one-story, frame, front-gable garage also dates to ca. 1900. It employs barn-like swinging doors and one standard door. The tenant garage functions as a pump house and the well and pump equipment are located in the basement of this building.

Owner's Garage (#7)

The owner's garage is a one-and-a-half-story, front-gable building with one set of sliding wood doors that allows access into an open-floor-plan garage. There is a stair along the east wall that historically allowed access to the second floor and was used as servant's quarters for the cook. This section, however, has been sealed off.

Potting Shed (#8)

The potting shed is a one-story structure with gable roof constructed ca. 1937.

Section 7 Page 6

Ramsay
Albemarle County, Virginia

Greenhouse Ruins (#9, #10, #11)

The grounds contain the concrete foundation ruins, ca. 1939, of three greenhouses. (3 Contributing Sites)

Smokehouse (#12)

The one-story smokehouse has three symmetrical bays and a flat, asphalt-shingle roof and was built ca. 1937.

Chicken house (#13)

The chicken house is a one-story, board-and-batten building, with a flat metal roof with sloped overhang on the south elevation over a bank of five 9-light windows constructed ca. 1937.

Equipment Shed (#14)

This is a one-story side-gable building with three symmetrical bays and an asphalt shingled roof built ca. 1937.

Slave Cabin Chimney (#15)

Purported to be the ruins of a slave cabin (ca.1830), the stone chimney with brick stack was moved to the property in the early 20th century. The chimney rests upon a stone foundation.

Turnaround (#16)

This circular cobblestone and brick turnaround was added to the property in the 1930s by the Gibsons.

Artist's Studio (#17) Noncontributing

The studio is a one-and-one-half-story wood frame building with large multi-light sash with a steep cross-gable metal roof with rear dormer and bird-house styled cupola, constructed 2001.

All of the outbuildings and other resources are in a good state of repair.

**Ramsay
Albemarle County, Virginia**

Summary Statement of Significance:

The Ramsay estate, situated in the beautiful Greenwood area of Albemarle County, Virginia is today a two-story, frame, Classical Revival-style house with a varied collection of outbuildings. Begun in 1900 by William Langhorne as a two-story frame central block with one-story wings at either end, the house was acquired by his cousin, Chiswell Dabney (Chillie) Langhorne in 1914, and was home to succeeding generations of the Langhorne and then the Gibson families. The property reflects the local practice of wealthy individuals to settle in Albemarle County and to construct or make over large houses to meet their ideas of a country estate. Virginia's well known "restoration" architect Milton Grigg was hired by owner Langhorne Gibson to make alterations to the house in 1937, 1947 and the early 1950s which resulted in the house's current appearance. Grigg also designed a boxwood garden and a barn for the estate as well as the guest cottage that became the retirement home of Irene Langhorne Gibson, Chillie Langhorne's daughter, whose husband the commercial artist, Charles Dana Gibson, painted her as the "Gibson Girl."

Criteria Statement:

Ramsay meets Criterion A because it is associated with the practice by wealthy families, many from outside Virginia, of establishing country estates in Albemarle County during the late 19th and early 20th centuries and often using older dwellings to fashion for themselves impressive manor houses. A number of these estates are located in the Greenwood area of the county including such estates as Casa Maria, Ednam, Seven Oaks, Tiverton and nearby Mirador, which was acquired by Chillie Langhorne in 1892.

Ramsay also meets Criterion C because the house is an important example of the work of the Virginia architect, Milton L. Grigg, whose restoration work at significant Virginia properties includes Monticello and Montpelier as well as Colonial Williamsburg. Grigg was the architect for many of the alterations occurring during the 1930s and 1940s at large estates in Albemarle County.

Historical Background:

Although Ramsay is most often associated with Chiswell Dabney (Chillie) Langhorne and his daughter, Irene Langhorne Gibson, the original owner, William H. Langhorne, was significant in his own right. William Langhorne commissioned the house around 1900, and at the time it was rumored to be one of the largest frame houses in the county. Such an architectural distinction matched the history of the Langhorne, as the family had important ties to early American history. Lieutenant John Langhorne--the family's founder--arrived in Virginia in 1673. He would later become a member of the Virginia General Assembly.³ Shortly after his arrival in Virginia he led a series of deliberations to determine the best possible response to Bacon's Rebellion in 1677. Later that decade he volunteered to provision a defensive force on the York River.⁴

In keeping with the typical settlement pattern in Virginia, the Langhorne ancestors spread across the state and settled throughout many regions in the nineteenth century. Chillie Langhorne's family first settled in

**United States Department of the Interior
National Park Service**

**National Register of Historic Places
Continuation Sheet**

**Ramsay
Albemarle County, Virginia**

Lynchburg, Virginia, but Langhorne's excursions to Albemarle County left him longing to settle near the beautiful Blue Ridge Mountains. The Greenwood area of Albemarle County became a popular location for residential development in the late 19th and early 20th centuries as newly wealthy families looked for opportunities to establish country estates or to enhance older properties with new construction. It was in keeping with this development that estates like Ramsay and Mirador, Ramsay's neighbor to the east, were established. This region of Albemarle County provided a cooler climate than that of cities such as Richmond and the picturesque beauty of this part of Albemarle County was a big draw for the wealthy social class.

In 1893 Chillie Langhorne first appeared in the Albemarle County tax records with his purchase of Mirador, which is listed in the National Register of Historic Places and significant, in part, for its association with Chillie Langhorne's five accomplished daughters, Elizabeth, Irene, Nancy, Phyllis and Nora. Daughter Irene Langhorne Gibson achieved social and artistic fame after her marriage to commercial artist Charles Dana Gibson in 1895 and her appearance as the "Gibson Girl" in her husband's popular turn-of-the-20th-century illustrations. Daughter Nancy Langhorne Astor became Lady Astor when she wed Lord Waldorf Astor. Later, with this title, she became the first female member of the British Houses of Parliament.⁵ There were also three sons in Chillie Langhorne's family.

Chillie Langhorne was a Richmond tobacco dealer, but it was his fortune made through railroad construction interests that allowed him to purchase Mirador, a close neighbor to Ramsay and other estates in Greenwood. Langhorne purchased Ramsay in 1914 and acquired other farms neighboring Mirador for his family throughout the first portion of the twentieth century. It was his intention to reside at Ramsay, but by 1916 his health failed and he was unable to move there. Langhorne deeded the property to Genevieve Peyton Langhorne, the widow of his son, Harry, and Chillie's caretaker for nine years. Genevieve Langhorne lived at Ramsay until 1929 and then deeded Ramsay to a Langhorne relative from Lynchburg, Effie B. Langhorne. Irene Langhorne Gibson's tie to the Ramsay estate was renewed in 1936 when her son, Langhorne Gibson, obtained control of the property through inheritance and moved to Ramsay with his wife, Parthenia. The Langhorne Gibsons gave the estate its current name in honor of a late-eighteenth-century British settler who received a land patent for the property.

The name, however, was not the only change the Gibson family brought to the estate. They were also responsible for bringing Charlottesville architect, Milton Grigg, to Ramsay. Milton LaTour Grigg (1905-1982) was born in Alexandria and studied architecture at the University of Virginia in the late 1920s. Between 1929 and 1933 he worked on restorations at Colonial Williamsburg with the Boston firm, Perry, Shaw & Hepburn. Grigg established his office in Charlottesville in 1933 and in 1936 added Floyd Johnson as partner. That partnership lasted through 1940 after which time Grigg associated with William Newton Hale, Jr. Grigg's firm was known as Grigg, Wood & Browne by 1977.⁶

In Albemarle County, Grigg had earned a reputation as a restorer of old buildings. He referred to his first clients as "Park Avenue Refugees" and described them as people who'd lost money in the depression and then moved to Virginia to regain some sense of their high standard of living. They bought old houses in need of repair and he was hired to do the restoration.⁷ At Ramsay, Grigg enlarged the house and made

**United States Department of the Interior
National Park Service**

**National Register of Historic Places
Continuation Sheet**

**Ramsay
Albemarle County, Virginia**

Section 8 Page 9

alterations both to the exterior and to the interior, creating the Classical Revival-style building seen today. He was also responsible for the installation of a formal boxwood garden and the design of the barn and many of the outbuildings located on the property that allowed it to continue in use as a working farm. The new outbuildings expanded the uses of the farm and transformed the working farm into a horse farm. The surrounding property made it possible to continue to raise other types of livestock and crops.

Although Grigg's influence on the property was significant, he was not responsible for the relocation on the property in the 1930s of the ruins of what is said to be a slave cabin located east of the main house. In keeping with the popular trend in the first half of the 20th century, collecting buildings reminiscent of the past to add to the romanticism or the nostalgia of large country estates was practiced at Ramsay. This trend began in the Victorian Era and carried over into the 20th century with the examples of such collections including Henry Ford's village in Michigan. Salvage materials from construction at nearby Mirador were also used at Ramsay as can be seen in the use of cobblestone throughout the property.

Grigg's work at Ramsay exemplifies his characteristic revision of simple country homes into refined classical estates. Other projects attributed to Milton Grigg in Albemarle County include the Albemarle County Courthouse in 1938, alterations to Glen Echo in 1935, alterations to Whilton in 1936, alterations to Merrie Mill Farm in 1938, restoration of Edgemont in 1940, alterations to Jumping Branch in 1940, and alterations to Fairview Farm and Verulam in 1941. In addition, he was consultant for restoration work at Monticello for 18 years and was associated with alterations at Montpelier in the 1950s.⁸

Grigg not only worked as an architect, but he was also a dedicated civil servant. His architectural skills were put to work as the civilian Chief of the Design Section of the Army Corps of Engineers in Washington, D.C. During his time in the nation's capital he administered the Master Recreation Plan for the Development of the Potomac River Basin and the Expansion of the National Airport facilities. He was also significant in the international arena when he was charged with the expansion of the United States Embassy in Canberra, Australia.⁹ Grigg also designed several buildings for the French government, city halls for Charlottesville, Alexandria, and Falls Church, and hundreds of church buildings.¹⁰

Although Grigg is often remembered for his various museum restoration projects and his church restoration projects throughout the east coast, as well as his estate restorations in Albemarle County, he did not consider himself primarily a restoration architect.¹¹ Grigg was also a significant figure in historic preservation as he was one of the founding members of the National Council for the Preservation of Historic Sites and Buildings.

Langhorne Gibson's family was the last of the Langhorne family to reside at Ramsay. After his naval service in World War I and II, he returned to the home to fill it with his father's paintings and enjoy his career in magazine advertising and the production of two naval histories. Langhorne Gibson lived at the house with his wife until his death in 1982 at which time she took ownership of the property until her death in 1998. Shortly after her death, their children sold the estate to the current owners, Harry and Susan Lankenau. The Lankenau family have rehabilitated it in a sensitive manner.

Verbal Boundary Description:

The boundaries of the Ramsay property, located at 7760 Rockfish Gap Turnpike, is located on the Albemarle County Tax Map 70 and it is defined as parcels 5 and 5a in the White Hall Magisterial District. This area is also known as Greenwood, thus giving it the address of 7760 Rockfish Gap Turnpike, Greenwood, Virginia 22943.

Boundary Justification:

The boundary for Ramsay includes the house, outbuildings and acreage historically associated with the property.
